### BÉLGICA:

#### NURSES

We are currently looking for nurses to work in different homes all over Flanders. You work in a team and are responsible for the correct implementation, monitoring and evaluation of your nursing tasks and this in dialogue with the head nurse. You have a nursing diploma (bachelor level or professional education), take initiative and have a sense of responsibility. You can listen and are also communicative. You work efficiently even under pressure and have a heart for elderly people. We offer you a challenging job within a motivated team. You are willing to learn Flemish (we will be helpful in giving you this opportunity). We can offer you a permanent job, fulltime or part-time and this according to your wishes. You can grow within a dynamic work environment in which the care for the residents and the collaborators is our mayour inspiration. We also guarantee a professional training policy and a competitive salary. Interested? Send your CV + motivation letter to Annie VANSEVEREN, Eures Advisor Gent (Belgium) [annie.vanseveren@vdab.be](mailto:annie.vanseveren@vdab.be) who will transmit your file to the employer.

#### Ph.D. scholarship (100%)

The research group Ecophysiology, Biochemistry and Toxicology (EB&T) focuses on the effects of natural and anthropogenic stressors on aquatic and terrestrial organisms. Central themes within the research group are the characterization of the mode of action of toxic compounds, assessment of the uptake and accumulation kinetics and effects on different levels of biological organization. Description of the position: Within the EB&T research group a position is vacant for a researcher (Ph.D.-scholarship) to investigate the interactions among toxic trace metals for uptake and toxicity in aquatic and terrestrial systems in terms of the mechanisms that affect metal bioavailability. Profile: You have a masters' degree in Biology or a Biology-related Master degree (i.e. Biomedical sciences; bio sciences engineer). The candidate is expected to prepare a Ph.D. and to participate in the organisation of practical courses and seminars. Your research and teaching capabilities are in line with the management goals of the university. We offer: A Ph.D. scholarship for a period of two years, with one possible extension of two years after a positive evaluation. Interested ? If you want more information on the description of the projects and the duties you can contact Prof. dr. R. Blust ([ronny.blust@ua.ac.be](mailto:ronny.blust@ua.ac.be)) or Prof. dr. Lieven Bervoets ([lieven.bervoets@ua.ac.be](mailto:lieven.bervoets@ua.ac.be)) Please submit your application, i.e. motivation and CV to Andrea Vlaemincq ([andrea.vlaemick@ua.ac.be](mailto:andrea.vlaemick@ua.ac.be)) before March 1st 2012.

#### Nurses

We are looking for nurses for elderly people in a home and carecenter. We find it very important that you can easily communicate with older people. You will work within a team that gives warm care-services in a pleasant and social atmosphere. You are willing to learn Dutch which will allow you to communicate better with the seniors. Please apply in English or French with CV, copy of your diploma and written proof of good behaviour. Take into account that almost half of the salary is deducted for taxes and social security. Herdershove Information: Annelies Thomas Address: Oude Oostendsesteenweg 95, 8000 Brugge, Belgium Phone: 0032 50 44 04 97 Email: [annelies.thomas@vdab.be](mailto:annelies.thomas@vdab.be)

#### Academic staff

Job description • You contribute to the development of high quality computer science education at the University of Antwerp; • Particularly, you contribute to the research-oriented education in the Msc program on databases; • You strengthen existing collaborations with other departments within the University of Antwerp and with other universities, related to the Msc in databases specialization; • The main language of instruction is Dutch; • You are part of the ADReM research group; • Your research activities concern the areas of databases and datamining; • You acquire and manage research funds; • You will participate in the general academic duties at the level of the department and the University of Antwerp. Your profile • You have a Ph.D. in computer sciences; • Your research skills are consistent with the policies of the university (<http://www.ua.ac.be/onderzoek>); • You have (potential) leadership qualities; • You have international experience; • You are quality-oriented, integer, creative and collaborative; • Expertise in data models and/or information retrieval is recommended; • Experience with databases and data mining and/or with interdisciplinary applications thereof, such as bioinformatics. We offer • Either a full time position at the level of docent, in temporary employment in the

tenure track system for a duration of five years. After this period, a permanent position is offered at the level of hoofddocent, if your performance is favorably assessed based on predetermined and publicly available criteria; • Or a full time position at the level of hoofddocent (senior lector / associate professor) or higher, which in principle leads to a permanent appointment. In case of a first appointment as faculty member, a temporary employment could be offered for a duration of at most three years. After this period, a permanent appointment is offered, if your performance is favorably assessed. • The expected date of appointment is October 1st, 2012; • A dynamic and stimulating environment. Interested? • Applications may be submitted online only, until the closing date February 17th 2012 • A pre-selection will be made from amongst the submitted applications. The remainder of the selection procedure is specific to the position and will be determined by the selection committee. • More information about the application form can be obtained from Ellen Huijter (Tel. 03 265 31 45) • For questions about the profile and the description of duties, please contact prof. Floris Geerts ([floris.geerts@ua.ac.be](mailto:floris.geerts@ua.ac.be) or tel. 03 265 38 94) or prof. Bart Goethals ([bart.goethals@ua.ac.be](mailto:bart.goethals@ua.ac.be) of tel. 03 265 33 09).

## ALEMANIA:

### TRABAJAR EN ALEMANIA

Recientemente han aparecido en la prensa diversas noticias relacionadas con la necesidad de personal en Alemania y dada la situación que padecemos en España son muchas las personas que se interesan por un trabajo en este país. Esto ha generado numerosas consultas en las oficinas de empleo y más especialmente en la red EURES, desde donde queremos aclarar ciertas informaciones :

A petición de Alemania se ha iniciado la colaboración entre los Servicios Públicos de Empleo de España y de Alemania, a través EURES-Alemania y EURES-España, para un proyecto de colaboración encaminado al reclutamiento de personal cualificado español para trabajar en Alemania.

Las áreas preferentes de reclutamiento son: Sanidad, Ingeniería, Docencia y Turismo-Hostelería. **Es necesario como mínimo un nivel intermedio de Alemán** ([B1/B2 del Marco Común Europeo de Referencia para las lenguas](#)).

Las personas interesadas en obtener información pueden dirigir un email con sus datos de contacto y sus características (en español y alemán) a la siguiente dirección de correo electrónico: [grupo.eures.alemania@sepe.es](mailto:grupo.eures.alemania@sepe.es) indicando en el asunto del email la referencia que corresponda a su **ámbito profesional**:

**Sanidad:** RFA. EURES Sanidad-Alemania

**Ingeniería:** RFA. EURES Ingeniería-Alemania

**Docencia:** RFA. EURES Docencia-Alemania

**Hostelería y Turismo:** RFA. EURES Turismo y Hostelería-Alemania

No obstante, aquellas personas pertenecientes a otros dominios profesionales y con buenos conocimientos de alemán pueden escribir indicando en el asunto: RFA. EURES otros-Alemania.

En una primera fase del proyecto se elaborará una lista de personas interesadas. Posteriormente se contactará con ellas para analizar el casamiento de las ofertas y demandas de empleo.

### Constructor (m/f) (degree in engineering)

CTRCentro terapeutico riabilitativo Information: Alessandro Angelo Rosella Address: Via Mercato, 30, 85038 Senise (Potenza), Italy Phone: +390973686660 Fax: +390973584078 Email: [personale@ctrsl.com](mailto:personale@ctrsl.com)

### 3 Research Fellowships to support PhD students

Talented and motivated candidates who have, or are expecting to obtain a Master or equivalent degree in a field relevant to the research undertaken within the GMPF programme, are invited to submit their application on-line. The on-line application is open until the 9 February (12 pm central European time). Short listed candidates will be interviewed by the end of March. Each project is developed as collaboration between the Fondazione Edmund Mach (FEM) and a GMPF partner institution. The main location will be FEM and at least one year of the PhD scholarship will be spent at the partner institute. The official working language is English. The fellowship is funded half from FEM and half from the partner institution. It includes a salary of 20.000 Euro per year (before taxes), which is provided for 3 years with the possibility to extend it for 1 more year, pending the approval of the Tutor Committee. Students will also benefit of reimbursement for travelling to the partner institution. Note that the GMPF PhD programme does not handle requests for registration as PhD student. FEM is a research Foundation and cannot issue the PhD degree. Therefore successful candidates will have to register as PhD student with the University partner of the project or with another University. Fellow students will have 1 year from when the fellowships starts to register as PhD students. If at the end of the first year the selected candidate is not yet registered as PhD student, the fellowship will stop. The PhD curricula are carried out according to the rules of the University where the candidate is enrolled. In addition to the official graduate certificate issued by the University, the GMPF PhD Programme issues a specific certificate. We offer 3 Research Fellowships to support PhD students in the following projects "Fine mapping and genetic dissection of important apple fruit quality trait by pedigree based analysis" - "Strategies to combine data blocks in systems biology" - "Apple breeding in the omics era: genetic mapping, transcriptom sequencing, and isolation of resistance genes to Nectria canker" - More info and application forms on: <http://www.gmpf.eu/index.php/eng/How-to-apply/Call>

### Plazas en investigación (inglés): aplicación de modelos matemáticos a sistemas biológicos. Industria pesquera. Trondheim, Noruega.

SINTEF Fisheries and Aquaculture AS is a research institute in the SINTEF group. Our 120 employees cover a wide range of academic backgrounds, and apply their knowledge to the sustainable use of marine resources. The institute finds solutions to challenges along the entire marine value chain, from the biological basis for marine production, through aquaculture and capture fisheries technology to processing and distribution. Today the institute has project activities in the region of 150 million NOK, all of which contribute to an increasingly advanced and technology-driven fisheries and aquaculture industry. The successful candidates will have an interest and ability to work in multidisciplinary development projects involving close contact with industry. This implies that the candidates are active in identifying challenges and development opportunities, and are able to solve these in cooperation with researchers from a variety of backgrounds, as well as industrial and other partners. A strong academic background (minimum MSc) and good communication skills are therefore necessary. Prior experience of multidisciplinary work, as well as experience from the marine industry is advantageous. **Researchers/ Senior Researchers in mathematical modeling** : Mathematical modeling is a tool that is becoming increasingly important within aquaculture and other marine industries. SINTEF Fisheries and Aquaculture works with models in areas ranging from biological processes, aquaculture structures and ships to ecosystems and currents in fjord systems and ocean regions, with the aim of gaining better understanding of these systems. This is an area undergoing a strong increase in activity, and we require several researchers with the ability and interest to continue this work. If you are interested in these positions, please contact: Research Director Jostein Storøy, mobile: +47 930 34 316, [jostein.storoy@sintef.no](mailto:jostein.storoy@sintef.no) Research Director Trine Galloway, mobile: +47 915 75 470, [trina.galloway@sintef.no](mailto:trina.galloway@sintef.no)

### Student – Knowledge Engineer/ Computational Linguist

As a Knowledge Engineer - Computational Linguist, you are a linguistic specialist with some experience and skills related to Information and Communication Technologies (programming or software development applied to language). You will be part of a multinational team that will focus on design, build, maintain and develop language specific knowledge-based systems, in domains such as artificial intelligence, databases, expert systems, and natural language processing systems – according to the structured Artificial Solutions Knowledge Development Methodology. The position offers a very valuable learning opportunity in a professional environment, and will allow you to grow both as a person and as a professional within your expert field. The position will focus upon:

- Work within a multinational project team in workshops and also independently.
- Working with the grammar of your native language to structure and code knowledge bases for our NLI (Natural Language Interaction) solutions, based on the project specifications.
- Collaborate with the other team members (Computational Linguists, Developers, Project Management team) in defining improvements of the process, tools and workflows related to the project. Essential Knowledge and Experience
- Undergraduate or graduate student in Computational Linguistics, Applied Linguistics, Language Technologies or similar.
- Knowledge of Morphology, Lexicology, Phonetics, Pragmatics, Automated speech analysis and synthesis.
- Understanding of Statistics (preferably applied to natural language analysis) / Mathematics
- Working knowledge of programming languages such as Prolog, or any of the declarative languages (C, C++, Java, Pascal, etc.) and DB/SQL.

What we Offer:

- Working under a Computational Linguistics multilingual project with Teneo Natural Language Interaction (NLI) Engine
- Upon performance, high opportunities of being offered a permanent job after the project is delivered.

Language skills: •High English level and your own native language is a must. ### Información del Graduate Teacher Programme:

<http://www.britishcouncil.org/learning-graduate-teacher-programme.htm>

CILT, the National Centre for Languages recruits native speakers of French, Spanish and German to train to become qualified teachers of languages in schools in England. The Graduate Teacher Programme (GTP) is a unique and innovative teacher training initiative for modern languages. The Graduate Teacher Programme is an employment based initiative which enables graduates to train and qualify as teachers while they work in a secondary school (pupils aged 11-16) in England. 'On-the-job' training is carried out over the course of one academic year and is combined with professional duties in the school.

The CILT GTP is unique because it is the only GTP in England which solely recruits native speakers of French, Spanish and German, providing a training course specifically designed to meet their needs.

At the end of the Graduate Teacher Programme training year, successful trainees gain Qualified Teacher Status

(QTS). This enables you to apply for work as a Newly Qualified Teacher (NQT) in England or Wales. It will not enable you to work as a qualified teacher in most other European Union countries.

## SUIZA:

### Wir suchen eine/n Rechtsanwalt/in mit guten Spanischkenntnissen
